- **Dr. Salil Nadkarni (CA) – 5**

Data Entry

Please enter all data as soon as practical so that we can track overall enrollment

- For Screen Failures, ensure that the Disposition Event- Screen Failure page is completed

The OpenClinica database used in the 2016-2017 flu season is being cleaned by Brightech. Sites that were active last year should check this database for queries.

Notes from the Medical Monitor

Please double check prohibited medications against the protocol before enrolling subjects

Physical Exams for subjects who are sick with the flu are not anticipated to be reported as “Normal.” The subject’s health status should be taken into consideration when documenting their Physical Exam.

Advertising

Visibility of this trial will be key to enrollment. Please ensure that posters and flyers are visible to all patients/subjects. Please share business cards to all patients at your clinics & research sites.

Yiling has recently provided additional posters to all sites. Please ensure that these are placed in highly visible place such as Libraries, Gyms, Churches, etc.

Yiling also recommends reaching out to local news / radio stations. These outlets may be interested in reporting on a flu treatment trial being conducted in the area.

Current Influeza Status, per CDC
